

## Casey Lawler

### Hometown

Lake Bluff, Illinois

### Recent positions include:

Planning and Projects Supervisor, Village of Highland Park

### About

After graduation I hope to pursue a career in planning or urban development where I can help to create a more sustainable built environment. During my time at DePaul, while maintaining a leadership and management role at Starbucks, I have also worked on

several placemaking initiatives with All Together in addition to helping set up a hydroponics system at Plant Chicago. In my free time, I enjoy exploring the natural environment and spending time with my friends and family.

### Notable memory

During the great shift in my educational experience on Zoom that resulted from the pandemic, Chaddick offered an opportunity to meet new people and explore the opportunities available at DePaul. Through Chaddick, I was introduced to many people with similar interests, while also being able to explore new learning opportunities put forth through Chaddick and their scholarship program. I am very grateful to Chaddick for the experience, especially in a time of great change at the university and throughout the world.
