At least two weeks prior to the projected proposal defense date, the student should submit, along with this form, an approx. 200 word précis of the dissertation project (a short summary of the projected dissertation's main thesis and argument, including the central figures and texts it will cover), as well as a brief chapter outline, to the Director of Graduate Studies for consideration by the Graduate Affairs Committee.

After review by the Graduate Affairs Committee, the Director of Graduate Studies will convey any suggestions or questions that they might have to the student and his or her Director. If in response to these suggestions or questions, the student and the Dissertation Director make any changes to the committee's membership, the student is asked to notify the Director of Graduate Studies concerning those changes.
